PROFESSIONAL SUMMARY

Junior Software Developer with a degree in Computer Science and a background in Fullstack Development using Python, React, and Next.js, with experience in Agile environments, REST APIs, AWS, relational databases, and AI projects. Fluent in English.

PROFESSIONAL EXPERIENCE

20DASH *Full Stack Developer Internship (09/2025 – 12/2025)*

- Developed microservices using AWS Lambda (Serverless) with the Chalice Framework;
- Automated video and image generation processes, reducing manual work time;
- Implemented RESTful APIs integrated with PostgreSQL databases, improving data retrieval performance and system reliability;
- Developed web interfaces using React.js and Vite.js, applying component-based architecture and Material UI (MUI) design;
- Collaborated on frontend and backend integration, ensuring efficient service communication;
- Applied clean coding practices, version control with Git, and task organization in an agile environment.

Elevential *Back-end Developer Internship (11/2024 – 01/2025)*

- Developed back-end features using Python and Django, reducing development time;
- Deployed web applications using AWS EC2 instances, ensuring high availability;
- Implemented integrations with PostgreSQL databases, ensuring data integrity and security;
- Contributed to front-end development using JavaScript, HTML, CSS, and Bootstrap, creating responsive interfaces;
- Participated in agile workflows using Scrum and Kanban;
- Contributed to the maintenance and continuous improvement of the web system.

Mackleaps *Front-end Developer Voluntary (03/2023 – 11/2023)*

- Led a team of 6 members in the front-end development of a web application for meteorological data visualization;
- Developed dynamic interfaces using React.js, JavaScript, HTML, and CSS;
- Implemented responsive layouts focused on user experience, achieving 75% user approval in usability testing;
- Applied teamwork, organization, and Agile methodologies (Scrum and Kanban);
- Acted with technical leadership in an applied academic project.

EDUCATION

FIAP Postgraduate Program in Full Stack Development (03/2026 – Present)

Universidade Presbiteriana Mackenzie Bachelor's Degree in Computer Science (02/2022 – 12/2025)

Final Graduation Project (Capstone)

- Development of a system based on Large Language Models (LLM) using Retrieval Augmented Generation (RAG) architecture;
- Implementation of a context retrieval pipeline using Python;
- Performance evaluation of AI models applied to Environmental Law;
- Comparative analysis of responses generated by models with and without RAG.

SKILLS

- **Languages:** Python, C#, JavaScript, TypeScript, SQL, C/C++;
- **Back-end:** Django, Flask, Chalice, .NET, Node.js, APIs RESTful
- **Front-end:** React.js, Next.js, Svelte, HTML, CSS, CSS Modules, Bootstrap;
- **Cloud & DevOps:** AWS, Google Cloud Platform (GCP), Azure, Docker, CI/CD, GitHub Actions;
- **Databases:** PostgreSQL, MySQL, SQLAlchemy, Alembic;
- **Tools:** Git, GitHub, Postman, Swagger, npm, Linux;
- **Best Practices:** Clean Code, SOLID, DDD, TDD, Design Patterns, Unit Tests;
- **AI & Data:** LLM, RAG, Applied Artificial Intelligence;
- **Soft Skills:** Agile methodologies, English Fluency, Communication, Organization, Teamwork.
